Sponsorship & Exhibition Opportunities

53rd international symposium
**European Association
for Aquatic Mammals**

BEAUVAL ZOO, FRANCE
11 – 14 MARCH 2025

Become a sponsor of the 53rd EAAM symposium

Bronze package

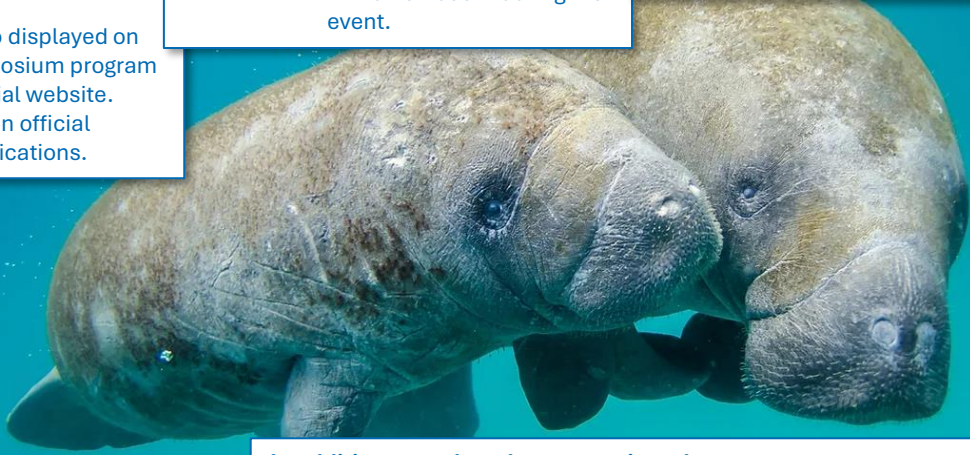

1. **Contribution** : 500 €
2. **Avantages** :
 - ✓ Your logo displayed on the symposium program and official website.
 - ✓ Mention in official communications.

Silver package

1. **Contribution** : 2000 €
2. **Avantages** :
 - ✓ All benefits from the Bronze Package.
 - ✓ Logo displayed on session materials and presentation screens.
 - ✓ Exhibition booth during the event.

Gold package

1. **Contribution** : 3500 €
2. **Avantages** :
 - ✓ All benefits from the Silver Package.
 - ✓ Speaking opportunity during one of the symposium sessions.
 - ✓ Prime visibility on all event communication materials.

In addition, stand out by sponsoring a key event :

- **Coffee Breaks**: Have your brand highlighted during refreshment breaks, a key networking moment.
- **Conservation Night Session**: Sponsor our special session, featuring movies screening and discussions focused on marine conservation. This event will be visible live on our social media.
- **Awards Ceremony**: Gain visibility by supporting the recognition of outstanding achievements in marine mammal science.
- **Gala Dinner**: Be the exclusive sponsor of the evening's formal dinner, attended by key figures in the field.

Each event sponsorship offers unique branding and visibility tailored to your company's objectives.

Act for biodiversity !

As a sponsor, a portion of your contribution will be dedicated to the Lahille's Dolphin Conservation Fund. This initiative aims to protect this endangered south American species.

Aquatic Mammal Welfare: A Key to Conservation Success

Caring for Individuals, Protecting Species

OUR 53rd ANNUAL SYMPOSIUM

Aquatic mammals continue to face significant and growing threats from human activities, including habitat degradation, pollution, climate change, and bycatch. As these challenges escalate, there is an urgent need for innovative solutions that integrate welfare science with conservation strategies to protect both ex-situ and wild populations.

This year, the EAAM conference seeks to spotlight how advancements in aquatic mammal welfare science can drive and enhance conservation efforts for wild populations. We invite researchers, practitioners, and experts to submit abstracts that explore how welfare science can improve animal care in zoological settings and how these insights can be applied to conservation practices in the field.

The upcoming conference aims to bridge the gap between animal welfare science and conservation by demonstrating how ex-situ expertise is critical to protecting aquatic mammals in the wild. Join us in showcasing the essential role that welfare science plays in both safeguarding individual animals and contributing to the long-term conservation of species.

Association for
Aquatic Mammals**

Devoted to conservation since 1972

WHO WE ARE – WHAT WE STAND FOR

The European Association for Aquatic Mammals (EAAM) was formed in 1972, with its head office located in Brussels, Belgium.

The EAAM is proud to bring together diverse members. Including veterinarians, biologists, ethologists, zoo and marine park specialists, conservationists, caretakers, researchers, students and other persons who devote a significant amount of time to the in situ and ex situ welfare and conservation of marine mammals through research, medical care, training, education, conservation, management and related activities.
